

QUANTROS®

BETTER DATA | BETTER INSIGHT | BETTER HEALTHCARE

Optimize Your Approach to Improving Outcomes

Executive Dashboard provides actionable and insightful data in a quick, straightforward, and easy to navigate tool. Compare risk adjusted clinical outcomes, as well as severity adjusted measures of utilization to expose opportunities for improvements and leverage areas of high performance to drive service line expansion. Take back the time you spend preparing data and reports and use it to optimize your approach to improve clinical and financial performance.

OUTCOMES & RATINGS CHARTS

Drill down capability into individual physician performance.

UTILIZATION DASHBOARDS

Snapshots of clinically adjusted cost per case and length of stay

SCORING ACROSS 5 KEY INDICATORS

DRILL-DOWN INTO EACH CHART

Click on each chart to identifying actionable drivers of care and inconsistencies at case, DRG, and physician level.

Quantros' Adjustment Methods for Equal Comparison

Be confident that the data you are seeing has been clinically and risk adjusted to give you the most accurate picture possible.

- ACCOUNT FOR DIFFERENCES IN PATIENT DEMOGRAPHIC, ACUITY, AND SEVERITY**
 Quantros' Severity, Intensity, Complexity™ (SIC™) model is used to adjust for resource utilization including charges, costs, and length of stay.
- COMPENSATE FOR CLINICAL DEMOGRAPHICS**
 Risk-Adjusted Indices (RAMI, RACI, and RARI) are used to benchmark performance against other providers by accounting for mortality, complications, readmissions and patient safety events.

Better Data, Better Insights

CMS data along with UB-04 Inpatient data provide a complete picture of your hospital's performance. Executive Dashboard is SOC2 compliant, giving you the peace of mind that system activity, configuration changes, and user access levels are being monitored.

Quality Outcomes & Ratings

Provides you a rapid line of sight into hospital and physician performance.

✓ View overall outcomes performance of hospitals and health systems

- Understand your organization's performance compared to the competition in your market
- Benchmark against hospitals and health systems nationally

✓ Quickly identify top and bottom performers internally and externally

- Identify poor performers and leverage top performers' conduct to enact change.
- Find top performing physicians for recruitment when expanding service lines, opening new facilities, etc.

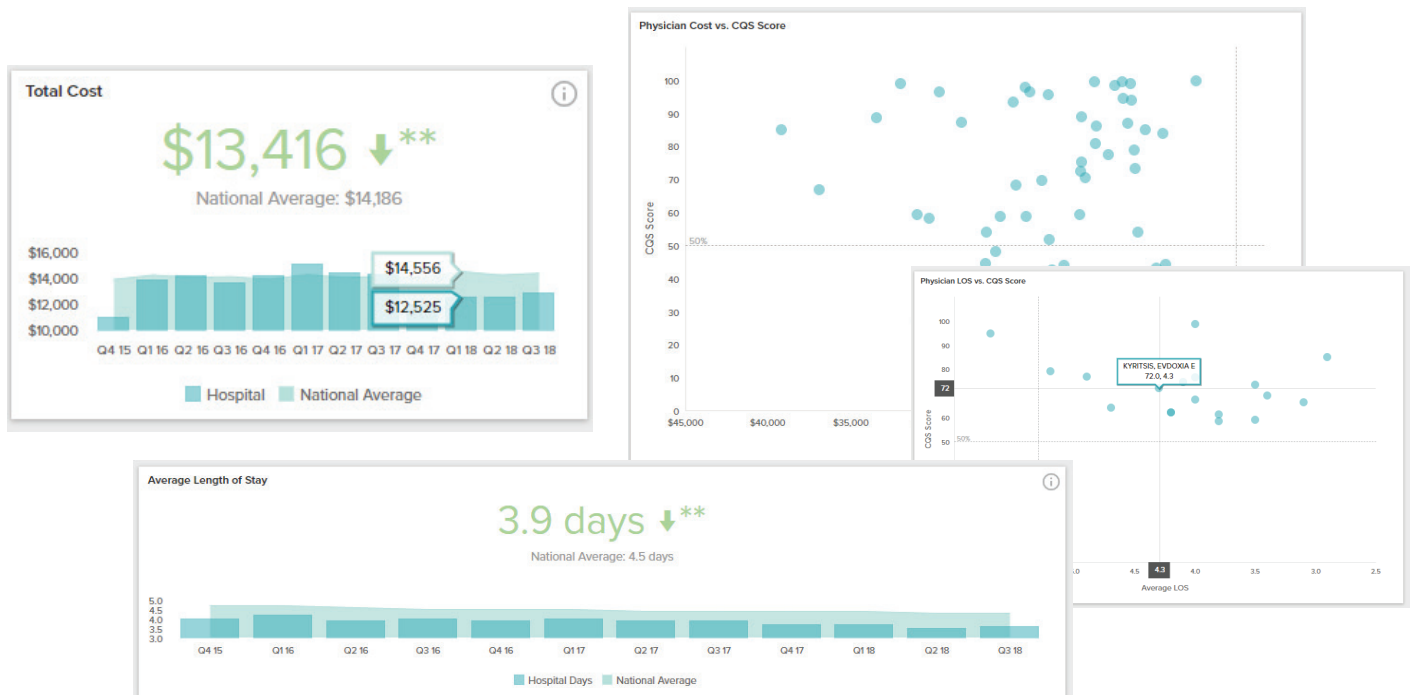

Media CareKit

Quantros' Media CareKit is designed to help your organization promote quality of care awards and achievements to the public to build trust and rapport across 39 clinical categories. The Media CareKit license grants your organization the right to use the CareChex logo in print media, on your organization's website, and television commercials. The CareChex name may also be used in radio spots and public interviews. With consistent use across all channels, your hospital's achievements in quality of care will make an impact among stakeholders.

Quality & Utilization Metrics

See how your performance stacks up. Utilization Analytics breaks down clinically adjusted cost and length of stay as compared to the national average with user-friendly, informative charts and graphs.
